

## Junior Crypto Researcher (50% – 100%)

### About Us

Cyber Capital, founded in 2016 and based in Amsterdam (Netherlands) is an investment firm committed to generate superior returns for their investors through an actively managed crypto-assets portfolio with a long-term investment horizon. We combine established crypto investment expertise with traditional investment processes to bridge the gap between digital investment opportunities and traditional investors looking to gain exposure to cryptocurrencies.

### About the Job

- Are you the type of person who likes to go down the rabbit hole of cryptocurrency?
- At Cyber Capital you will support senior researchers in finding alpha within a large pool of project information.
- Keep a finger on the pulse in general around crypto developments and the competition.
- Contribute to the production of research reports.
- Help the research team maintain searchable sector databases.
- Debate on an ongoing basis with our researchers.
- We are building out our team, and we are looking for you to ride down this river with us!

### About you

- You must have a strong passion for the crypto industry and have some understanding of investment strategies.
- Have been interested in the crypto space since 2018 and witnessed the cycles of the market.
- Have strong views and ability to defend those views.
- Ability to work under pressure and independently.
- Enjoy deep fundamental debates.
- Comfortable with numbers and a computer science knowledge is a plus.
- Fluent in English oral and written. Chinese is a plus.
- Based in the Netherlands (Amsterdam) or in Switzerland (Zurich/Zug) is a plus but not a prerequisite.

### Apply to Cyber Capital

Thanks for your interest in careers at Cyber Capital. If you think you could be a good fit for our team, we look forward to hearing from you.

When submitting your application to [careers@cyber.capital](mailto:careers@cyber.capital), remember to include a motivation letter, a curriculum vitae as well as available references.
