

## Crypto Researcher (full time)

### About Us

Cyber Capital, founded in 2016 and based in Amsterdam (Netherlands) is an investment firm committed to generate superior returns for their investors through an actively managed crypto-assets portfolio with a long-term investment horizon. We combine established crypto investment expertise with traditional investment processes to bridge the gap between digital investment opportunities and traditional investors looking to gain exposure to cryptocurrencies. At Cyber Capital we go the extra mile when it comes to doing fundamental research. The crypto space is a fast moving sector with a small community. At Cyber Capital, we understand this and you will be able to work with like-minded people who understand the technology and are in it for the long run.

### About the Job

- Are you the type of person who likes to go down the rabbit hole of cryptocurrency?
- At Cyber Capital you will keep a finger on the pulse in general around crypto developments and the competition.
- You will find alpha together with other senior researchers for the fund.
- Read technical whitepapers and be a second opinion if promises of projects can be achieved.
- Talk with project teams personally to gain better understanding.
- Be hands on and interact with the protocols and assets themselves.
- Have weekly fundamental debates with the research team on possible assets.
- Join conferences to network, speak and represent the company (optional).
- We are building out our team, and we are looking for you to ride down this river with us!

### About you

- You must have a strong understanding of the crypto industry both from a direct investment or a fund of fund type of investment experience.
- Have been within the crypto space at least since 2018, but preferably since 2016 and have witnessed the cycles of the market.
- Having a strong background in computer science is an asset.
- A proven track record of success and achievement within crypto; hands-on; decisive, focusing on priorities.

- Have strong views and ability to defend those views.
- Ability to work under pressure.
- Enjoy deep fundamental debates.
- Fluent in English. Chinese would be an additional asset.
- Based in the Netherlands (Amsterdam) or in Switzerland (Zurich/Zug) is a plus but not a prerequisite.

### Competencies

- Results-oriented and structured approach
- Ready to make investment calls
- Detail-oriented and precise
- Analytical and critical thinking
- Independent worker
- Team player
